

CARBON WINS FROM ACME

The Carbon Lawn Tennis Club received a visit from the Acme Club on May 10th. The result was a win for Carbon by four events to three, after a hard fought and interesting match. The return match at Acme will most likely result in some exciting play, and Carbon will need to be in their best form on that occasion as the Acme Club has greatly improved since last season.

The following kindly acted as umpires during the match: Messrs. A.H. Jealous, H. Edwards, H. MacDonald, V. Hawkins, L. Poxon and W. Poxon Jr.

After the play the visitors were entertained at lunch by the Carbon Club, and W.A. Braisher gave an address of welcome, which was replied to by the President of the Acme Club, Dr. Fowler, and also by J. Taylor.

The following are the results and scores:

Mens' Singles—W. Edwards of Carbon defeated J. Taylor of Acme 6-3, 6-3; Bruce Ramsay of Carbon defeated J. W. Donald of Acme 6-2, 3-6, 7-5.

Mens' Doubles—Len Poxon and J.M. MacDonald of Carbon defeated C. Smith and L. Oel of Acme 6-0, 6-2; V. Hawkins and H. Brown of Carbon defeated R. Moore and C. Lavelle of Acme 4-6, 6-3, 6-2.

Ladies' Singles—Mrs. P. Fowler of Acme defeated Mrs. Willson of Carbon 6-1, 3-6, 6-2.

Ladies' Doubles—Misses P. Fowler and D. Hotsenpillar of Acme defeated the Misses N. Hemming and I. Nash of Carbon 2-6, 6-5, 8-6.

Mixed Doubles—J. Taylor and Miss D. Hotsenpillar of Acme defeated C. Nash and Miss D. Nash of Carbon 6-0, 6-4.

GEESSE REST NEAR WINNIPEG ON NORTHERN JOURNEY

Flocks of several thousand wild geese the forerunners of vast flocks estimated to contain nearly a million geese, have arrived from the south and form a magnificent sight on the prairie land west of Winnipeg. The flocks, which contain geese of several species, including the well-known Canada goose, the blue goose and several sub-species, known to sportsmen as "Wavies," will soon continue their long annual trip to Baffin Land, north of the Hudson Bay, where they nest on the Arctic tundras.

In addition to the enormous flocks of geese, a large flock of snow-white wind swans have attracted much interest among passengers on the C.N.R. trains passing their feeding grounds. Many old-timers of the plains state that this is the first time that such a large flock of these huge birds, have been seen in the country. At a distance they appear to have bodies larger than a pelican and three times the size of a goose. It is estimated that their long necks, straight when frightened, but ordinarily displaying the graceful swan curves, are fully three feet in length.

CARBON WATERWORKS COMPANY IS FORMED

This may be a "scare heading" but that is actually what has happened for a few people in town, although so far they have confined their operations to gardens. W. Poxon has had a dam constructed up the coulee and spring water is being piped down to six houses on that street. There is sufficient water to run a good sized garden spray and with this added water supply we expect these citizens to have lawns and flower gardens on their premises; and a good vegetable garden, too! "Beautiful Carbon" should be the slogan of these favored citizens.

Shot White Crow

What's in a name? Well, the first white crow on record in this country was shot by Tommy White, the well known sportsman and lawyer of Holden. Mr. White shot the crow with a .22 calibre pistol, no mean feat in itself.

At first sight the crow looks almost a pure white, but closer inspection showed it to be a piebald white and brown, about the most weird example of a crow ever seen in Alberta or anywhere else.

The white crow was going about its lawful occasions with two ordinary crows, when it was seen by the lawyer and after some stalking, willfully and maliciously, but not feloniously shot.

The crow is on route to Professor Rowan of the zoology department of the University of Alberta, where it will doubtless be stuffed and kept as an exhibit.

STRATHMORE TO HAVE \$200,000 BROADCASTING STATION

(Strathmore Standard)

The most powerful radio broadcasting station in Canada is to be erected within a mile and half of Strathmore in the near future, and will be ready for operation by September.

The Western Broadcasting Company has decided on Strathmore, in the face of representations and offers from other centres, within a hundred mile radius of Calgary, as the best location for the pioneer key station for Western Canada. Their new super power station C.F.C.N., the "Voice of the Prairie" under the technical direction of Mr. W. W. Grant, pioneer Canadian radio engineer, who will likely make his home here, will be located on the main highway east of town, just beyond the Johnson farm.

An expenditure of about \$200,000 is involved in the installation.

The station will utilize an input of 50,000 watts, and will have a transmitter output of 10,000 watts, which is the same as that of K O A Denver. It is expected that the recently adopted wave length of 304 metres, allotted to no other station in North America, will be used.

The studio will be located in Calgary, and will be connected to the station by two direct telephone circuits.

C.I. HART DIES OF PNEUMONIA

Word was received on Thursday last that George Ingraham Hart, son of Mr. and Mrs. J. B. Hart of Carbon, had passed away in the Holy Cross hospital, Calgary, that day.

The deceased was working for John Clayton in Calgary and on Friday, May 1st, he was stricken with pneumonia and rushed to the hospital, where he died on May 7th, after an illness of less than a week.

The deceased was born in Wallace Bay, N.S. and when but two years old came to the Carbon district with his parents, who settled on the farm they now occupy. Two years ago Ingraham went to the Olds School of Agriculture and since that time he has been at home. This spring he went to Calgary to work.

Deceased was 25 years of age and he leaves to mourn his loss his parents, one sister and one brother, at home near Carbon, and one sister living in the United States.

One of the largest funerals ever held in the district took place on Sunday, May 10th, at 2 p.m. and friends and acquaintances were present from Calgary, Acme, Three Hills, Swatwell, Hesketh, Carbon and other points.

Rev. A.R. Schrag of Three Hills and Rev. Wm. McNichol of Carbon had charge of the funeral services, which were held from the family residence about five miles north of Carbon. The pallbearers were Messrs. Ken Anderson, Leo Halstead, Sidney Wright, Sam Clayton, John Congo and Fred Fuller. Interment was made in the Carbon cemetery.

ALBERTA NEWS

Irricana is endeavoring to form a live Board of Trade to help along the business matters of that town and district.

It has been reported that W. Irvine, U.F.A. member for Wetaskiwin, may enter the Bennett cabinet as Minister of Labor.

Quite a number of Carstairs golfers are playing on the Didsbury course this year. Evidently Carstairs needs a Golf Course.

A number of districts to the north and west of Carbon experienced a good rainfall last week.

The Strathmore School Board has decided to add to the curriculum, the teaching of piano lessons to groups of children in the Public School.

About 100 crows and magpies were killed at the opening shoot of the High River Fish and Game Association on May 6th. Nearly 100 eggs were taken.

The mill rate at Strathmore this year has been set at 50 mills. Some difference between that and Carbon's 25 mills.

The Drumheller unemployed are keeping their children away from school as a means of forcing the government to continue unemployment relief.

Local sportsmen in the Didsbury district are having good luck in raising the Chinese ring-necked Pheasant. One man expects to raise 50 young pheasants this year.

The yo-yo is a simple little toy, but is gradually dying out in Gleichen. It did relieve the unemployment here for a time.—Gleichen Call.

Seeding has been practically completed in the Olds district.

Alfred Schroyen, age 17, of Three Hills, was fatally injured at that town last week, when, in attempting to get aboard a passing freight train, he slipped and two cars passed over his legs. He died in the Trochu hospital shortly afterwards.

GOLFERS, TURN OUT !!

The Irricana Golf Club will visit the Carbon Golf Club on Sunday morning next and all members and prospective members of the local club are asked to be present to play on that day. These games will be the first in the Herald playoffs and should prove exciting. Members are requested to note that, while it is realized that only a few of the players will have much chance of coping high honors, their presence is requested to make up enough matches to give all the visitors a game.

The golf course will be in splendid shape by that time. All the greens are being sanded and oiled and this work is about completed.

Don't forget to be out in your golf togs and be ready to play at 11:00 a.m. on Sunday morning.

Rain Needed

OTTAWA, Ont., May 13.—Seeding conditions as of April 30 were given in the crop report issued by the Dominion Bureau of Statistics Tuesday. In the Maritimes the season was two weeks earlier than usual. Conditions were good in Quebec and Ontario. In the prairies there was lack of moisture and in British Columbia the weather had been favorable.

Since May 1st the spring season in the Maritime provinces and in Eastern Canada has continued generally favorable. In Nova Scotia seeding has been somewhat hindered by cool and showery weather. Plentiful rains in Quebec and Ontario have encouraged growth. In the prairie provinces, precipitation of some benefit has been received, but there are still large and important areas in southern and central Saskatchewan and central Alberta in immediate need of rain for germination. Most of the agricultural regions of Manitoba received rain or snow in the first week of the month, and in the same period, helpful precipitation was recorded in south-western and northern Alberta. Saskatchewan received no relief from the prevailing drought until May 7, when scattered and light rains fell over the province, heaviest in the north.

FINANCIAL DEPRESSION HAS NO EFFECT ON CONSCIENCE

Although financial conditions are not good at the present time, there are still some whose consciences give them more trouble than the thought of their depleted bank roll. This fact was brought to light in Winnipeg when R. Creelman, Passenger Traffic Manager for the C.N.R. received the following letter:

"While in the City of Regina, Sask. I found on a store floor a small book. On investigating same I found it to be a R.R. pass and on enquiring found the owner to be in hospital. I decided I would use same and risked getting through as I was travelling west.

"Now I have never done wrong in my life. I don't know why I did this, but I destroyed pass on reaching the journey's end and now I am enclosing \$20.00 to cover expense of trip from Regina to Edson, as that is where the accident occurred. Kindly consider that the owner was not in any way to blame and I hope this will satisfy all.

You don't realize the lifting power of yeast until you compare the prices of wheat and bread.—Drumheller Mail

MORROW DOES HOLE-IN-ONE

Young "Bud" Morrow, Carbon High school boy, was successful in making the No. 1 hole on the Carbon Golf course in one on Sunday evening. The length of the hole is 152 yards. "Bud" was playing with Mr. and Mrs. Jos. J. Grogan at the time and his drive landed in front of the green, but could not be seen from the tee. After the other players had made their approach shots they were unable to find "Bud's" ball and after considerable searching the ball was located in the cup.

This is an experience that very few golfers enjoy and experts claim that that chances of making a hole in one are about 100,000 to one.

This is the first time that any hole has been made in one on the Carbon Golf Course, although we know of a number of golfers who would like the sensation of doing so.

CARD OF THANKS

The Hart family wish to thank their many friends, who by word or deed, helped them in their first hour of sorrow.

Proposal May Be Made to Gov't.

The Financial Post Says: "It is understood that one proposal will be made to the Government for the issuance of an additional \$50,000,000 of paper currency by the government, to be loaned to farmers at low rates of interest. If this inflation of Canadian currency leads to further depreciation in the Canadian dollar so much the better the sponsors of the plan intend to argue, as this will give the Canadian exporter of wheat and other products advantages abroad and will tend to discourage importations. How the currency is to be kept in circulation so that it will be presented to the government for redemption and how the losses to governments and corporations that have gold bonds payable abroad are to be absorbed, may or may not be explained.

But, apart from hairbrained schemes such as this one, we are in for a period of insistent demands for the complete overhauling of a banking system that has grown up with and kept pace with the country and which is the envy of practically every other nation in the world. Probably the government will remain cool-headed and calm. But the public, which knows little of the fundamentals of banking, would be interested in knowing more about how banking operates in Canada. It is a significant opportunity for Canadian bank leaders to do a good job of public education in an open and above-board manner. The traditional policy of almost entirely ignoring attack, of hesitating to reply to specific or general complaints, of modestly leaving it to the public to learn for themselves how the banking system operates, does not provide a sufficient bulwark of security for banking in Canada. The banks may well, at this juncture, decide to do more talking.

Taking Canada's Census

The decennial task of "counting noses" in Canada, or, in other words, the enumeration of the census of the Canadian people, takes place in the month of June. It is a big and fairly expensive job requiring the services of a small army of men, and, after their initial work is completed, hundreds of clerks and expert statisticians will be engaged for months compiling, tabulating and analyzing the returns sent in to Ottawa by these thousands of enumerators.

The question may naturally arise in the minds of some people: Is it all worth while? Is such a large expense justified, especially in these times of declining revenues and enforced economies, merely to ascertain how many people there are in Canada, and an array of facts relative to each individual?

There can be only one answer to such questions. It is very much worth while; in fact, it is vitally important. Just as it is of importance and value to a farmer to know how many bushels of grain he may have produced from a given number of acres; how many chickens he possesses; how many pounds of milk and cream his cows have produced; or to a business man how great his annual turnover has been, so is the collection of the census information of importance and value to the nation as a whole. It is a form of national stocktaking.

But that is not all. Under our Canadian system of government, and the relationships, financial and otherwise, which exist between the Federal and Provincial governments, population is an important factor. In many respects it is the all-important, the deciding factor.

First and foremost, the representation of the people in Parliament is based on population. Let us illustrate: Suppose, for example, the census shows a population of 3,000,000 people in the Province of Quebec. Under the constitution those 3,000,000 people are entitled to 65 members in the House of Commons, that is, one member for each 46,154 people. Therefore, each group of 46,154 people in every other Province is entitled to a member. After each decennial census there is a redistribution of representation in the House of Commons based on the facts disclosed by the census. In this way the representation of all parts of the Dominion is made and kept uniform and equitable.

Furthermore, the financial relations between the Dominion and the Provinces is based on population. The Dominion pays cash grants to the Provinces of so much per head of population, and in the case of the three prairie provinces it pays increasing amounts annually as population increases until a certain maximum amount is reached. Unless there was a census-taking these amounts could not be accurately ascertained.

Again, only by knowing the population is it possible to arrive at such facts as the amount of the per capita debt, per capita taxation, volume of trade and commerce per capita, and a volume of other statistical matter upon which both national and Provincial policies of finance and taxation are founded.

While the enumerators are thus "counting noses" they are also gathering other important information. The wealth of the Dominion, its productive capacity, the social condition of its people, their racial antecedents, the extent of their illiteracy, how many males and how many females, how many children, middle-aged, and aged people,—information all having a bearing on future policies for the development and well-being of the Canadian nation.

This year, for the first time, complete information is to be obtained on the subject of unemployment,—how many are out of work, the nature of their usual employment, what caused their state of unemployment, etc., etc.,—all with a view to finding out the actual extent and causes of unemployment as a guide to finding out and applying the necessary remedies, and developing policies to prevent a recurrence of such an unsatisfactory and deplorable condition.

It will be seen, therefore, that the census-taking is a vitally important national undertaking. It is clearly the duty of every citizen to co-operate with and assist the census enumerator in his work. His questions should not be resented, but, on the contrary, should be welcomed and full information freely and gladly given to him. He will be discharging his duty, a national duty at that. In like manner the citizen will be discharging a national duty by extending every assistance in his power.

Largest Fur Shipment

The largest single shipment of white fox pelts ever received in Winnipeg reached the city recently by Canadian National express. This shipment was transported from the shores of Hudson Bay over the Hudson Bay Railway. The shipment, which was billed independently of the large fur companies included 431 white fox pelts and a dozen red fox pelts, all of which were trapped in the high north during the past winter.

Has Many Friends

One of New York's wealthiest bachelors is Summer Ballard, once known as "a millionaire reporter." Each year in his town house he gives a dinner party for 200 of his friends. It is said to comprise the strangest list ever collected under a single roof, representing almost every strata of society from newsboy to millionaire.

Denmark has only 179 miles of air service routes.

Heart and Nerves So Bad Was Unable To Sleep For Hours

Miss Theresa M. Ravary, Callingtontown, Ont., writes:—"I was troubled, for almost a year, with my heart and nerves, especially on retiring at night when I would be unable to sleep for hours. I was easily fatigued, and became very excitable and irritable. A friend recommended Milburn's Heart and Nerve Pills and after taking them for a few weeks I could enjoy a good night's rest, and rapidly regained my former state of health."

Soviets Could Mobilize Large Army Quickly

National Leaders Have Made Provision For Any Emergency

Despite protests from the Soviet that the Russians are working for peace it is estimated that the nation could mobilize an army of 17,000,000 men within three months of the outbreak of war. Of these, some 10,000,000 would be members of line regiments and provide a rifle strength of that number.

Within three weeks of the start, the Soviet is believed capable of throwing 3,000,000 fighting men into action. In addition, the national leaders have been concentrating on supplies, and they keep permanently in reserve enough coal to last three months. They are also building up the air wing of the fighting corps.

Besides tossing bushels of wheat on the world markets, the Soviet is evidently ready to throw in quite a supply of cannon fodder when the time comes.

MOURING WARDROBE

"A death occurred in our family and I had to go in mourning. I could hardly afford to buy all black clothes, so decided to dye what I had. I consulted our druggist and he advised using Diamond Dyes. Everything came out beautifully; coats, wool dresses, stockings and all. I have since learned to appreciate the excellence of the black Diamond Dyes. I tried another black dye and the results were impossible. I had to get Diamond Dyes and do the work over. Recently I have tinted my curtains a beautiful raspberry shade and dyed a rug a lovely garnet with Diamond Dyes. They are real money savers—the finest dyes money can buy—I truly believe."

Mrs. G. K. L., Montreal.

Vimy Memorial

Major Newburn Will Endeavour To Hasten Completion Of Work

Maj.-General S. C. Newburn, of Hamilton, Ont., who sailed for Europe on the "Empress of France," will endeavour to hasten completion of the Vimy memorial while overseas, he said. Before the boat left, the officer, in referring to the memorial said:

"As chairman of the national battlefields commission, I am going to meet General Hughes, who is now in Europe, and one of the things I will do is try and expedite the completion of the Vimy memorial. This memorial was supposed to be finished next year, but I understand there has been some delay in receiving the stone and while I can say nothing officially, it is possible that the completion of the memorial will be somewhat later than expected."

Worms are encouraged by morbid conditions of the stomach and bowels, and so subsist. Miller's Worm Powders will alter these conditions almost immediately and will sweep the worms away. No destructive parasite can live in contact with this medicine, which is not only a worm destroyer, but a health-giving medicine most beneficial to the young constitution.

Record For Apple

Apples of any variety that cannot stay a week off the branch without rotting ought to blush in shame before the record of a clove apple in the possession of Mrs. Charles Hollins, Worcester, Mass. Plucked at Bridgewater 62 years ago and preserved, it is in as good a condition as if just taken from a tree.

Nights Of Agony come in the train of asthma. The victim cannot lie down, and sleep is driven from his brain. What grateful relief is the immediate effect of Dr. J. D. Kellogg's Asthma Remedy. It banishes the frightful conditions, clears the passages, and enables the afflicted one to again sleep as soundly and restfully as a child. Insist on the genuine at your nearby druggist.

Market Low Grade Wheat

The Edmonton Chamber of Commerce has appointed a committee to prepare a report in connection with the development of an Eastern market for low grade Alberta wheat and coarse grain. The object will be to sell to Ontario and Quebec supplies of low grade grains for feeding purposes.

Worms feed upon the vitality of children and endanger their lives. A simple and effective remedy is Mother Graves' Worm Exterminator.

Use Machine Guns

Toronto Police Force Being Trained To Handle Deadly Weapons

Detectives of the Toronto police department are being trained to handle machine guns if the occasion ever arises to use these deadly weapons, the Toronto Star says. Three guns that fire 1,000 rounds in a minute and bullets that travel 930 feet a second, are being experimented with, by Inspector Robert Alexander, aide to Chief Draper, and officer in charge of training.

Officers of the motorcycle squad, the Star further says, are also taking part in the training which will be extended to other ranks after all detectives are thoroughly schooled.

The Bible contains two chapters, which are nearly alike, word for word. They are the nineteenth chapter of II Kings, and the thirty-seventh chapter of Isaiah.

Government Advertising Campaign

Large Sum Spent In Urging People To Buy Canadian-Made Goods

Total of \$92,020.77 was spent by the Dominion Government in the advertisements of the Department of Trade and Commerce which urged the people of Canada to buy Canadian-made goods. This sum had been spent since the present administration assumed office, according to a return tabled in the House of Commons.

The money was distributed among the newspapers of the country as follows: Dailies, \$38,023.49; farm papers, \$36,417.46; miscellaneous, \$13,976.98, and weeklies \$3,602.84.

A new automobile has been constructed in London, England, for the Maharajah of Patiall, the glass enclosure of which enables the occupants to see out, but prevents outsiders seeing in.

Western Students Receive Post Graduate Scholarships Awarded By National Research Council

The post-graduate scholarships awarded by the National Research Council for this year were announced recently. The scholarships total in value \$38,600, and have been awarded to 55 students. There are five fellowships for which \$1,000 each are given, 24 studentships each carrying with it \$750, and 26 bursaries, to the value of \$600 each.

The students obtaining the scholarships, the University of Graduation and the Department of Science in which award will be held include:

H. D. Smith, British Columbia, physics.

Studentships—Awarded in Western Canada: J. M. Armstrong, Saskatchewan, genetics; Miss M. H. Campbell, British Columbia, zoology; E. G. Hallonquist, British Columbia, cellulose chemistry; R. N. H. Haslam, Saskatchewan, physics; M. K. McPhail, British Columbia, biochemistry; F. L. Munro, British Columbia, physical chemistry; F. H. Nicoll, Saskatchewan, physics; H. R. Sallans, Saskatchewan, organic chemistry; C. A. Winkler, Manitoba, physical chemistry.

Bursaries, awarded in Western Canada: J. F. Caley, Alberta, geology; K. R. Gray, British Columbia, organic chemistry; G. A. Harcourt, Alberta, geology; Miss J. F. L. Hart, British Columbia, zoology; O. J. Johansson, Saskatchewan, chemistry; N. B. Keevil, Saskatchewan, chemistry; H. B. Marshall, British Columbia, organic chemistry; J. H. L. Truscott, Saskatchewan, plant pathology.

A statement accompanying the results declared:

"Selection of the successful candidates from the total of 166 who applied was made at the regular meeting of the council in March, but pending receipt of acceptances, public announcement was delayed. Rather than reduce the number of awards available, the council reduced their value. These have been offered to the candidates selected and acknowledgments have now been received.

"It is the opinion of the council that students to whom awards have now been made will be able to continue their work satisfactorily in spite of the reduction in value which has been made necessary this year by the reduction in the fund made available by the council for this purpose.

"Because of recent statements indicating that a certain amount of misunderstanding exists, Dr. H. M. Tory, the president of the council, has made the statement that all applicants compete each year on their merit and that there has never been any guarantee whatsoever that awards once granted would be renewed for a second or a third year. That this, however, was often the case is indicated by the fact that in the 13 years in which the council has awarded scholarships, 476 awards have been made to 283 students but the awards are made each year to the applicants which in the opinion of the council are the most promising."

May Visit Russia

Rt. Hon. David Lloyd George, the Liberal chieftain, may visit Russia in September. Mr. Lloyd George is said to be greatly interested in the Russian five-year plan and wants to make a first-hand investigation. Once before he proposed a Russian trip and the Soviet Government offered him every opportunity to make inquiries.

"What a lovely fur coat. How much did it cost you?"
"Three fits of hysteria."—Hummel, Hamburg.

W. N. U. 1889

France Buying More Wheat From Canada

Report Shows Outlook For Future Sales Is Good

In the first two months of 1931 Canada exported to France nearly twice as much wheat as during the months of November and December of last year and seven times as much as during the first two months of 1930. This information was contained in a statement prepared for Hon. H. H. Stevens, Minister of Trade and Commerce, by Hercule Barre, Canadian government trade commissioner in France. This indicates a serious effort on the part of France to fulfil the promise made to Premier R. B. Bennett, when the prime minister and Mr. Stevens visited France after the Imperial conference, the report declares.

For the three months following the unofficial agreement between France and Canada, French imports of Canadian wheat have amounted to 6,482,174 bushels, an increase of 2,430,000 bushels over the three previous months.

While Canada has been selling more wheat to France, the imports from other countries have not kept pace. In January and February of 1930, Canada supplied 17 per cent. of France's total imports of wheat whereas in the first two months of 1931 she supplied 54 per cent.

That the outlook for future sales is good is indicated in the report. The domestic stocks of wheat in France of sufficient specific weight are decreasing steadily, requiring more and more the use of wheat of high gluten content for mixing. "As this condition is becoming more marked" the report states, "there is naturally a greater demand among millers for Manitoba wheat which is generally considered as most effective for strengthening purposes."

Bee Battalions Fly

Huge Stores Of Honey Now Being Accumulated By Busy Workers

With the arrival of the bright sunny days of spring and early summer and the wealth of bloom new growth brings, the bee battalions resume their annual work of storing honey. Canada's annual honey crop ranges into millions of pounds gathered in at apiaries located throughout the entire Dominion. We all know that the proverbial busy bee sets a commendable example, and that huge stores of honey accumulate in the healthy hive. A better appreciation of the magnitude of the task which is the bees' in building up their stores, is afforded by figures just released by the Bee Division of the Dominion Department of Agriculture. As the result of a series of studies conducted over a period of five years it has been found by weighing hives that an average of 31,000 bees per hive wing their busy way in search of sweet nectar from day to day during the height of the season.

British Egg Market

Britain Imports 4,640,000 Dozen Eggs Per Week

In the current issue of the foreign egg market report the Poultry Division of the Dominion Department of Agriculture indicates that Great Britain at the present time is importing upwards of 4,640,000 dozen eggs per week. Denmark, the Netherlands and Poland are the largest contributors to this huge volume of exports; other countries include the Irish Free State, Belgium, Finland, France, Germany, Italy, Sweden, China and Egypt. Canada is not, at the present time, listed as a consigning country although a market which imports such huge quantities of eggs should hold something of opportunity for Canadian producers.

World's Largest Seed Tester

Declared to be the largest in the world, the Swedish State seed testing station was recently inaugurated by the country's crown prince. It also is said to be the most modern in every particular. Last year 108,127 analyses were made by Sweden's seed testing department.

Good Prices For Export Cattle

Movement Of Live Cattle To Great Britain On Profitable Basis

Cables were received by Hon. Robert Weir, Minister of Agriculture, giving the prices received for the latest shipment of cattle to Britain. These are sufficiently high to make the movement of live cattle from Canada to the United Kingdom one of great possibilities.

At the same time British Co-operative Association representatives who have recently toured Canada, have undertaken, subject to ratification by their directorate, to take 75 Canadian cattle a week for 12 weeks, in order to decide the feasibility of a steady flow of 400 head weekly for the "Co-Op's" trade in Britain.

On the shipment for which the prices were made known, one carload of finished cattle from Calgary will net the shipper back in Alberta over \$5.65 per hundredweight. Another carload, also from Alberta, will net the shipper over \$6.00 per hundredweight.

With these prices known, a meeting of shipping representatives from Montreal has been arranged with Mr. Weir, to take place here, Monday, May 4, to canvass the number of cattle ready for shipment and the ocean space available. The present is an opportune time to ship cattle to the United Kingdom as Irish fat cattle are practically off the market for the next two or three months.

Will Travel In Modern Way

Dalai Lama, Of Tibet, Has Ordered Motor Car

Departing from all the traditions of his country and faith, His Holiness the Dalai Lama, ecclesiastical king of Tibet, has ordered an automobile sent to him at Lhasa, high in the Himalayas.

A newly trained Chinese chauffeur will pilot the car where routes are navigable, but where no roads exist, parties of 30 coolies each will be posted along the mountain passes and on the desolate Tibetan plateau to carry it in relays to its destination.

Heretofore, all automobiles have been dubbed "devil wagons" by highly superstitious Tibetans.

A National Air Tour Of Over Seven Thousand Miles Will Be Held This Summer

League Of Nations

League Will Succeed If People Are Behind It, Says Dr. Tory

"If the League of Nations is going to succeed, it will be because the people of the world put themselves behind the principles for which the League of Nations stands."

This was the declaration made by Dr. H. M. Tory, president of the League of Nations Society in Canada. The distinguished scientist and student of world affairs, who is also head of the National Research Council, was speaking to a large gathering of members of the Border Cities branch of the League of Nations Society of Canada at Ottawa.

"The League of Nations," he said, "has passed through a great deal of criticism. This year it is facing one of its most serious situations because of the coming disarmament conferences. It will be either strengthened or weakened in public opinion as the result of that conference."

Poultry Grades

Canadian Standard For Dressed Poultry Is Published

A supplement to the Canadian Standards for Dressed Poultry issued by the Poultry Division of the Dominion Live Stock Branch provides the following classification of kinds and sub-kinds: Chickens include squab broilers, broilers, fryers, roasters, poulards, capons and stags; Fowl include hens and roosters; the Turkey classes are young hens, young toms, old hens, and old toms; Ducks—ducklings and ducks; Geese—goslings and geese; Pigeons—squab pigeons and pigeons; and Guinea—guinea chickens and guinea fowl. Complete definitions and packing instructions are now available for distribution to interested parties through the Publications Branch of the Department of Agriculture at Ottawa.

The Short and the Long of It

John Griffiths, diminutive Liverpool boy with ambition, signed on the Canadian Pacific liner "Duchess of Richmond" as a "bellboy" and made his first voyage on that liner when she opened St. Lawrence navigation for 1931 by reaching Montreal, Sunday, April 19th. John is 15, four feet and half an inch tall, and is looked upon as a mascot by the ship's company. With him is John Kane, Master-At-Arms of the "Duchess of Richmond," who as the tallest man on the ship stands six feet two inches above the deck.

Signalizing the progress of aviation in the Dominion, a national air tour will this summer be carried out by the Canadian Flying Clubs' Association, assisted by the Aviation League of Canada. From the standpoint of the mileage to be covered and the number of aeroplanes taking part, the tour will be the greatest ever undertaken in any part of the world, said G. M. Ross, secretary of the Canadian Flying Clubs' Association, in making the announcement at Ottawa.

Occupying two months, the air pageant will visit every city in Canada where there are flying clubs affiliated with the association. A minimum of 25 machines, in a variety of types entered by manufacturers, distributors, commercial operators and private owners will take part in a journey of some 7,500 miles.

Date of the commencement of the flights and the itinerary will be announced in the near future, Mr. Ross said.

It is expected the National Defence Department will officially sanction participation by Royal Canadian Air Force pilots. The association hopes through the tour to foster interest in the construction of municipal airports and to encourage wider use of air mail services. Flying exhibitions will be staged in conjunction with local flying clubs at various points.

Soliciting Business In British West Indies

Vancouver Woman Has Been Entrusted With Difficult Task

A woman has been chosen to find a market for the surplus oats production of the Fraser Valley, in British Columbia. She is Miss Elsie Bridges, manager of the export department of a Vancouver grain company, and she is on her way to the British West Indies to see what can be done about drumming up business in that territory.

Every year the Fraser Valley ships about 3,000 tons of oats to the West Indies, where the grain is used as feed for mules working on sugar plantations. Miss Bridges will have stiff competition from German and Dutch salesmen, who have been taking a lot of business. "But," says the manager of the grain company, Ernest Buckerfield, "I have a suspicion that Miss Bridges will win. She is that sort of woman."

Heavy Tourist Traffic Forecast

Reports Indicate Good Business For West Says C.P.R. Official

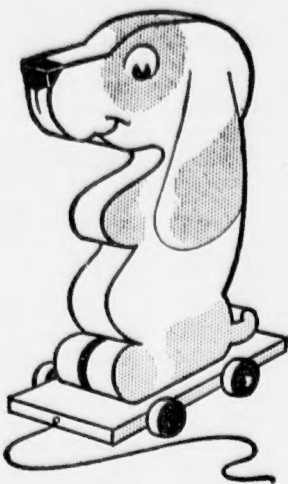

Heavy tourist traffic for Western Canada this summer is confidently expected by the Canadian Pacific Railway, according to C. B. Foster, of Montreal, passenger traffic manager, who with H. R. Mathewson, general passenger agent, Winnipeg, has been on one of his regular semi-annual trips to the Pacific coast.

"There will not be so much European tourist trade from North America this year as in previous years," Mr. Foster said. "That, however, will result in more money being spent in Canada. Our reports from all parts of the continent indicate that there is no doubt about this."

A noiseless airplane is planned by a British engineer.

"I gave a man an old suit and he then asked me for three shillings."
"What for?"
"To get the suit disinfected." — Buen Humor, Madrid.

WHEN CHILDREN

FRET THERE are times when a child is too fretful or feverish to be sung to sleep. There are some pains a mother cannot pat away. But there's quick comfort in Castoria!

For diarrhea, and other infantile ills, give this pure vegetable preparation. Whenever coated tongues tell of constipation; whenever there's any sign of sluggishness. Castoria has a good taste; children love to take it. Buy the genuine—with Chas. H. Fletcher's signature on wrapper.

SUNDAY SCHOOL LESSON

MAY 17

JESUS ENTERS JERUSALEM AS KING

Golden Text: "He is Lord of lords, and King of kings."—Revelation 17, 14.

Lesson: Luke 19.28 to 20.47.

Devotional Reading: Psalm 24.

Explanations and Comments

Preparations For Christ's Triumphant Entry, 19.29-35.—And when he had thus spoken (his account follows immediately the giving of the "Parable of the Pounds"), Jesus went before His disciples on their way to Jerusalem. "The Jerusalem road is no Appian way lined with the tombs of dead gallantries; it is no macadam road running through the hills and over the moorland to the city or the sea. It is rather the direction of desire, a purpose pursued, a quest adopted and a conquest won. It reveals the Christ of the sacrificial purpose."

The triumphal entry was deliberately planned. It was Jesus' last appeal to the people to accept Him as the kind of King He was. He would exhaust the possibilities of the situation, though He could not have expected to turn the people's mind away from the kind of king they wanted—an earthly rather than a spiritual sovereign.

In the neighborhood of Bethany and Bethphage, on the Mount of Olives, He sent two of His disciples to a near-by village to secure for Him a colt that had never been ridden, they would find tied there. In case the owner objected, they had only to say, "The Lord hath need of him." These words may have been the password which Jesus had arranged with the owner of the colt. From John 12.1 we know that he had stopped for at least a night at Bethany, when He would have had time to make such an arrangement. An ordinary beast of burden would have been unsuitable for a distinguished rider, whereas the ass that had never carried any one met the requirements. It all happened in just that way—the colt was found, the question of the owner and the answer of the disciples were given, and the latter returned to Jesus with the colt.

By choosing an ass to ride upon, Jesus plainly showed the people that He was not to be thought of as a military leader, for the horse was used in warfare, while the ass was the fitting animal for the Prince of Peace. The people threw garments on the colt for Jesus to sit upon and upon the roadway to make a carpeted passage for Him, all to honor Jesus as King, just as in our day Californians have strewn the roadway with flowers to honor a President.

The King's Royal Progress, 19.36-38.—As they went down the Mount of Olives toward the city, the joyous crowd shouted and praised God for all the mighty works which they had seen, and cried "Blessed is the King that cometh in the name of the Lord." Compare Isaiah 62.11; Zechariah 9.9; Psalm 118.26.

"Peace in heaven and glory in the highest," they sang. These words were taken from Psalm 118, the Messianic Psalm. "Why peace in heaven?" Perhaps they meant that peace in heaven was prophetic of that peace He was bringing to earth, that He was the Unconquerable One, before whom all enemies would lay down their arms without daring to fight.—R. C. Gillie.

Mothers Value This Oil.—Mothers who know how suddenly croup may seize their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Electric Oil, because experience has taught them that this is an excellent preparation for the treatment of this ailment. And they are wise, for its various uses render it a valuable medicine.

Canadians Honored

Scientific Men Elected As Fellows Of Royal Society Of Canada

Ten Canadians distinguished in scientific and academic fields have been elected as Fellows of the Royal Society of Canada. The recipients of this honor, as announced are:

Section 1.—Rev. O. Maurault, director of Montreal classical school.

Section 3.—Dr. Harold Hibbert, McGill University; Dr. Joseph A. Pearce, Dominion astrophysical observatory, Victoria, B.C.; T. T. Rosebrugh, University of Toronto.

Section 4.—Professor M. B. Baker, Queen's University; Dr. William E. Cockfield, geological survey, Vancouver; Dr. P. S. Warren, University of Alberta.

Section 5.—Dr. C. H. Best, University of Toronto; H. T. Gussow, Dominion botanist, experimental farm, Ottawa; Dr. Pierre Masson, University of Montreal.

The next meeting of the society will be held in Toronto, where the members will be the guests of the University of Toronto.

A large elephant will consume from 100 to 125 pounds of hay a day, besides the mash which is also given.

How Women Lose Fat In England

How would you like to lose unhealthy fat that you don't need and don't want, and at the same time feel better than you have for years?

How would you like to lose your double chin and your too prominent abdomen, and at the same time make your skin so clean and clear that it will compel admiration?

How would you like to get your weight down to normal, and at the same time develop that urge for activity that makes work a pleasure and also gain in ambition and keenness of mind?

Get on the scales to-day and see how much you weigh—then get a bottle of Kruschen Salts. Take one-half teaspoonful every morning in a glass of hot water, and when you have finished the first bottle weigh yourself again.

Now you will know the pleasant way to lose unsightly fat, and you'll also know that the six vitalizing salts of Kruschen have presented you with glorious health.

That's the way Englishwomen keep slim—why not you?

British Navy Will Visit Kiel

For the first time in 17 years a British naval unit will visit Germany this summer. The admiralty announced it had accepted an invitation from the German Government and that H.M.S. Dorsetshire and H.M.S. Norfolk, would pay an unofficial call at Kiel from July 4 to July 11. The last time such a thing happened was in June, 1914.

Reduction of railway fares in the Philippines is forcing bus lines to merge.

New Cunard Liner

Seventy-Three Thousand Ton Vessel Being Built In Scotland For Trans-Atlantic Travel

Practically the whole world will take some part or other in the construction of the new 73,000-ton Cunard liner at present being built at the yards of the John Brown Company, Clydebank, Scotland.

This liner, which when finished will be the finest liner ever constructed for trans-Atlantic travel, is the result of four years' intensive planning on the part of the best marine minds that could be brought together.

For several years before the ship was ordered, intricate tests were carried out in the laboratories of John Brown and Company, for which models—exact replicas of the new Cunarder—were constructed. These models were placed in specially-designed tanks and submitted to every condition of wave and wind that might possibly be encountered on the Atlantic Ocean.

When the final model was approved and the plans for the docking facilities completed at Southampton, work was commenced in the same yards in which the world famous "Aquitania" was constructed.

Right across the Clyde from where the new Cunarder is being built is the River Cart. It will be necessary to cut a very large part of the bank of this river away as well as deepen it, as the launching of such a large vessel is without precedent; launching preparations are at present demanding a great deal of care in the working out of the problems of committing the giant vessel to the water.

This recalls to mind the great care and attention which was paid to the launching of the "Aquitania" when she was launched on the Clyde, and at that event it was found expedient to make a large cut in the bank of the river to allow for the ship to be launched.

The household equipment for this new "Queen of the Seas" will include 300,000 pieces of silver, 2,000,000 pieces of china, pottery and glass, and an incredible quantity of linen and furnishings of every conceivable sort.

Indications at present point to a launching early in 1932—considerably in advance of the date originally set last year when the order was given to John Brown and Company.

The first opportunity that the general public will have to view the construction of this new Cunarder will be when the yards of John Brown and Company are opened for public inspection during Glasgow Week, and preparations are being made for thousands of visitors to be taken care of who are anxious to get a glimpse of this ocean giant in the making.

To Detect Intoxication

Chemical Detection Invented By University Professor

A chemical detector of intoxication has been invented by Dr. Rollo N. Harger, of Indiana University. It makes possible an unerring detection of intoxication by taking a sample of the human breath and subjecting it to simple chemical tests. The device may serve police authorities to convict persons of driving motor cars under the influence of liquor. If there is alcohol in the breath the solution changes color from red to white even when the breath has no odor of alcohol.

Douglas' Egyptian Liniment should be in every household. Stops bleeding at once, cauterizes wounds and prevents blood poisoning. Keeps away inflammation and proud flesh.

Central Heating Plant

The Northern Public Service Corporation and the Winnipeg Heating Co., have purchased a site for their new central heating plant, and work will commence soon. The cost of the plant is estimated at \$1,500,000. It will provide employment for 1,000 men.

MANITOBA POOL MAY ADOPT A NEW SYSTEM

Winnipeg, Man.—Manitoba Wheat Pool members will be given the right to choose between pooling their grain voluntarily, or selling it on the open market, if proposals announced recently by Manitoba Pool directors are approved by members. If the proposals are adopted, they will come into force June 1, 1931.

Contained in a letter signed by President Colin H. Burnell and forwarded to all Pool members, the proposals will be discussed at special meetings of 94 Pool locals in Manitoba, to be held during the last week in May. Under the suggested changes, all open-market sales would be handled by Manitoba Pool Elevators, Ltd., the Pool's elevator system.

Decision to pave the way for alteration of the principle of the Pool contract, should members so desire, was reached at a meeting of the board of directors at Winnipeg, May April 10-13, at which consideration 1. It followed a directors' meeting was given to a resolution passed at the annual Pool delegates meeting last November, asking directors to call a 1931 summer meeting to consider the question of handling the 1931 crop.

If members of the Manitoba Pool approve the proposals — and it is expected that adoption will be unanimous — the grain handled by Manitoba Pool Elevators, Limited, will be "hedged" immediately on the futures market. "Hedging" is sale of grain on futures contract to guard against a price-drop. Decision to "hedge" grain would mark a drastic change in Pool policy, which has on basic principle spurned the use of "hedging."

Mr. Burnell lists the directors' proposals as follows:

- 1.—The pooling of grain to be placed on a purely voluntary basis.
- 2.—All grain not pooled to be sold through Manitoba Pool Elevators, Limited, on the open market.
- 3.—That the proposed changes be submitted to the 94 Pool locals at meetings which will be held in the last week of May, in order that every member may have an opportunity to become acquainted with them.
- 4.—That the plan come into force on June 1, 1931.

Every Pool member is urged in the Burnell letter to attend his local meeting "and give his personal support to this endeavor to carry co-operative marketing through a critical time."

Alberta Wheat Pool

Will Carry Out Its Usual Policies Says Henry Wise Wood

Calgary, Alberta. — The Alberta Wheat Pool will carry out its usual policies and members will be bound by contracts which they have signed, said Henry Wise Wood, chairman of the Alberta Pool, when informed that the Manitoba Wheat Pool will solicit the opinion of members as to whether they wish the privilege of selling their grain on the open market after June 1, through the Pool elevator system.

"Action by the Manitoba Pool has nothing whatever to do with our pool, and I might say that we intend to carry on in the future as we have done in the past," Mr. Wood declared.

Children Had Long Journey

Winnipeg, Man.—A journey half way around the world, with another 24 hours to go, left three young Czecho-Slovakians arriving in Winnipeg still undismayed. Anton, 9 years; Joseph, 8, and Helena, 5, travelling to their father, Anthony Lycka, at Coleman, Alberta, spent a jolly hour in the precincts of the Canadian Pacific station before continuing their journey westward.

Boy Bandit Escapes Lashes

Ottawa, Ont.—The 20 lashes to which Robert Kitowski, a Fort Frances boy slightly over 16 years, was sentenced have been remitted by order-in-council signed by the Governor-General. Kitowski, who robbed a bank, was sentenced by a police magistrate to five years and 20 lashes.

W. N. U. 1889

Experts Will Attend Wheat Conference

Discussion At Canada House, London, England, Will Be Private

London, England.—All the wheat exporting nations of the world, including Soviet Russia, will be represented at the wheat conference opening on May 18, at Canada House here, under the chairmanship of Hon. G. Howard Ferguson, Canadian high commissioner to Great Britain.

The United States has already indicated it is sending three experts. Russian participation is assured. And the conference, an outgrowth of the world wheat conference at Rome, will be enabled to make a thorough study of the world wheat situation so far as it particularly concerns the exporting nations, preliminary to endeavors to reach agreement on some form of orderly marketing of the next wheat crops.

The conference is expected to last about a week and the discussions will be private.

Canada's high commissioner—Hon. G. Howard Ferguson—will represent this Dominion at the wheat conference to be convened in London, England, on May 18. The advisers who were present with Mr. Ferguson at the wheat conference in Rome will again act in the same capacity at the London wheat conference.

Installed In Office

Alberta's Lieutenant-Governor Sworn In At Impressive Ceremony

Edmonton, Alberta.—On May 5, Hon. W. L. Walsh, former supreme court judge of the province, became Alberta's fourth lieutenant-governor since its creation in 1905. Successor to Hon. William Egbert, he was sworn into office at the legislative buildings here in an impressive and brilliant ceremony attended by the viceregal retinue, Alberta's judiciary and members of the legislature. Hon. Mr. Walsh took the oath of office administered by Hon. Horace Harvey, chief justice of the supreme court of Alberta.

A colorful gathering attended the swearing-in ceremony. Col. A. C. Gillespie, aide-de-camp, met the viceregal train at Millet, and accompanied the new occupants of Government House to Edmonton. Civic officials, as well as provincial government heads and prominent judicial representatives, greeted the first citizen of Alberta and Edmonton on his arrival here.

B.C. Cattle For Russia

Negotiations Opened Up For Purchase Of Pure Bred Stock

Vancouver, B.C.—It is understood that Soviet Russia may buy a number of purebred dairy cattle from British Columbia farms to strengthen the herds of Eastern Siberia. Negotiations were opened some months ago, and steps are now being taken to arrange the best means of handling them. They are to go from here to Japan, and will be trans-shipped from there either to Harbin or Vladivostok. It is understood that the first shipment will consist of 40 head.

Another movement of dairy stock from this province is that to Shanghai, and it is becoming a regular one. A dairy farm at Shanghai is taking about 10 head of good grade milkers monthly, and it is expected this will continue. It is in the nature of replacement, as mortality in the dairy herds at Shanghai is fairly heavy.

For Uniform Auto Laws

Inter-Provincial Convention To Be Held At Ottawa This Month

Montreal, Que.—An interprovincial convention will be held at Ottawa, May 20 and 21, where delegates of the roads departments of the various provinces will meet to discuss ways and means to obtain uniform laws regulating traffic on the highways of Canada, it was announced by Hon. J. E. Perreault, Minister of Roads, at the local provincial offices.

It was explained by the minister that, because of the inter-provincial traffic on the roads connecting the different parts of the country, it had become urgent to harmonize the regulations of automobile traffic.

Some of the laws adopted at Quebec had been widely discussed in the other provinces, said Mr. Perreault, and it is hoped that when properly explained, they will be adopted by all.

EXILED TO SIBERIA

Mme. Vera Flegner, famous Russian woman leader, who, at the age of 76, has been exiled to Siberia for her protests of flogging by Soviet of 40 women members of Socialist party. Under the czarist regime she was repeatedly flogged and imprisoned for her attitude toward existing order of things.

Senate Craves Work

Lack Of Legislation Given As Reason For Slack Hours

Ottawa, Ont.—Restless because of inactivity, the Senate is searching for work. Since the present session opened, the Upper House has deliberated only about 10 hours altogether, because of lack of legislation originating in the House of Commons. Today, the Senate had an informal discussion on the aims and achievements of the League of Nations.

Rising at the conclusion of the informal debate, Senator John Lewis pointed to the lack of legislation to be considered by the Senate at the present time. It was generally supposed the Upper House acted as a "brake," he said, but he could see no reason why speed and direction of public thought could not be influenced also by the Senate.

Leads In Wheat Production

States That Russia Is World's Leading Producer Of Wheat

Washington, D.C.—Russia again is the world's leading producer of wheat. Figures supporting that unsuspected and highly significant statement were expected to be released about May 20, by the United States Department of Agriculture.

It was said that Russian production for 1930 likely would be announced at 1,097,000,000 bushels, which is 246,000,000 bushels more than was produced by the United States—largest wheat producers since Russia left the export picture during the war.

HAPPY SCENES IN MADRID

One of dramatic scenes typical of celebrations that marked the fall of King Alfonso and the establishment of a Spanish republic. Riding on the shoulders of their colleagues in Madrid, these republicans are waving the new Spanish republican flag.

Eckener Will Meet Wilkins In Arctic

Announces Plan To Start For North Pole In July

Friedrichshafen, Germany. — Dr. Hugo Eckener, master of the Graf Zeppelin, announces he will start for the North Pole in his big ship about the middle of July to meet Sir Hubert Wilkins, who is going up there in a submarine.

This attempt to make a contact with Sir Hubert at or near the pole, he said, should clarify the question as to whether the airship is the most appropriate means for landing polar expeditions near their destination, picking them up later and providing them with supplies during their stay in the Arctic.

The Zeppelin expedition is to be financed by William Randolph Hearst, whose newspapers also are backing the Wilkins voyage.

The Graf will carry 45 persons on the Arctic flight, including Lady Drummond Hay.

It will take along complete polar equipment, including sledges, boats and arctic clothing. The time of the start will depend on the progress of the Wilkins expedition.

Ottawa Dismissals

Information Given Out Regarding Retirements Of Employees

Ottawa, Ont.—Of the 1,295 employees of the Department of the Interior, who have been retired or notified of retirement, 442 were permanent on the staff at Ottawa, and 126 temporary. In the outside service 591 were permanent and 136 temporary employees. This information was given to E. R. E. Chevrier, (Liberal, Ottawa), in the House of Commons by Hon. T. G. Murphy, Minister of the Interior, in answer to a question.

The Dominion lands administration service loses the largest number of personnel, with 442 employees being retired, or notified of retirement, while the forestry service loses 436. A total of 116 will be dismissed from the surveys bureau.

Letters Seized

Letters Containing Irish Sweepstake Tickets Stopped At Winnipeg

Winnipeg, Man.—Thousands of letters were seized at the Winnipeg post office because they were found to contain Irish sweepstake tickets on the English Derby. The seizure was made under orders of the postmaster-general of Canada, as sweepstake mail is illegal under Section 236 of the Criminal Code.

The postal staff here have seized numerous letters containing the tickets in the past week, but recent collection was the largest on record. The letters, disguised in various ways, will be returned to the dead letter office, Ottawa.

WOULD EXTEND BRITISH TRADE WITH DOMINION

Ottawa, Ont.—"We are fully assured that there is a strong pro-British sentiment in Canada and that the manufacturers in this country are willing to co-operate with English industrialists along lines that are complementary, and supplementary," Sir James Lithgow, president of the Federation of British Industries, said in an interview here. "We are fully conscious that there is over-production in the empire and throughout the world, for the relief of which British industrialists are willing to do their part, and we believe that there are openings and directions in which it is to Canada's advantage at present to buy in England."

Sir James is leading a trade delegation which has come to Canada upon the invitation of Hon. H. H. Stevens, Minister of Trade and Commerce, to study economic conditions and to discuss with the government and manufacturers of the Dominion ways and means of extending British trade in Canada. The other members of the delegation are Sir Arthur Duckham and Moir MacKenzie. They interviewed Mr. Stevens, but no statement was given out regarding the conference.

Busy Times Ahead

Prophecy Is Made That Canada Will Soon Need Immigrants To Meet Demand For Workers

Toronto, Ont.—Prophecy that Canada would be needing immigrants to meet the demand for workers within two years, was made by Col. R. E. Smythe, director of the Technical Service Council, at the 10th annual convention here of the Ontario office superintendents of the Employment Service of Canada.

It was urged that a clause requiring that 75 per cent. of the help needed in construction of public works be secured through the Employment Service of Canada, should be included in government contracts. The Federal Government will be approached to ensure the inclusion of a clause to this effect.

It was resolved to request the department of labor to take additional means to discourage importation requests and that the immigration department be asked to check carefully all skilled workers seeking admittance to Canada.

Probe Mail Thefts

Series Of International Mail Robberies To Be Investigated

New York.—Postal authorities both here and in Great Britain began an investigation of a series of international mail robberies, the extent of which officials have not yet been able to determine.

A systematic rifling of letters, some containing remittances to persons in Ulster, Ireland, has been going on some time, it was learned recently. United States and British postal authorities have been pushing their investigation, co-operating by cable.

It is believed the mail has been robbed on the United States side and not after reaching England and Ireland.

Grain Shipments

Alberta Wheat Stored At Coast Is Now Moving Rapidly

Vancouver, B.C.—Grain stored for many months in the Victoria and Prince Rupert elevators, controlled by the Alberta Wheat Pool and the New Westminster elevator, is now moving.

At Prince Rupert it is expected the balance of the 1,000,000 bushels in storage all winter will move out within the next week. Two full cargoes of 10,000 tons each have been fixed for the Victoria elevator within the next fortnight, leaving 10,000 tons in storage. At New Westminster the Belgian steamer "Suevler" commenced loading 1,800 tons for Antwerp.

Reduced Wheat Acreage

Canberra, Australia. — Approximately 13,500,000 acres of land will be sown to wheat in Australia in the coming season, compared with 18,000,000 acres last year, the government states.

CLEAN UP !!!

Most of the citizens of Carbon make
it their annual spring task to see that
their ashes are hauled away and their
yards cleaned up. However, there is
the odd one that does not seem to care
how his premises are kept and conse-
quently such places are an eyesore to
the Village. Now is the opportune
time to have all premises and ash
heaps cleaned up. The fly season is
here and unless every precaution is
taken these ash heaps will be a regu-
lar breeding ground for these in-
sects. Every citizen should realize this
and when they understand that flies
are one of the worst of the pests that
carry diseases they ought to be only
too glad to clean up their premises
now and get all traces of these flies
destroyed. So, again we say, clean
away your ash heaps at once. Also,
clean up your yards, so that our town
will not look like many that one pas-
ses through in going from one city to
another.

OUR FRIEND, THE DOG

(Drumheller Review)

Glancing over some recent press de-
spatches, we noticed a story depicting
the devotion and sacrifice of a collie
dog, named "Laddie," which stirred
our heart, and took us back to the
days when our dog was as faithful as
any nurse could possibly be in guard-
ing over the baby carriage. Briefly
Laddie gave his life in an attempt to
save his baby boy playmate from a
fire, which destroyed the home, and
showed human intelligence in trying
to get the door open, and get his young
charge out of the burning building.
Laddie failed, but when the charred
remains of his boy master and him-
self were found, Laddie was lying over
the little fellow protecting his body
until the last, from the ravages of the
fire, Laddie did not have any pedigree,
like the sport writers of the dailies
write about, but what a splendid spec-
imen of the dumb animal, which for
ages has come so close to the members
of the human family. This is just one
of the many true stories about the
devotion of dogs, cats, horses, cows,
and even members of the feathered
flock, which in times of stress and need
have shown practically human intelli-
gence and faculty of serving mankind.

CENSUS QUESTIONS

These are the questions that will be
asked about each person by the Do-
minion Government census-taker dur-
ing the opening week of June:

Your name and where you live.

Whether your home is owned or
rented.

The estimated value of your home,
if owned, or the monthly rental, if it
is rented.

How many rooms are in your home,
and is it of stone, or brick, or wood?

Is there a radio set in your home?

Your relationship to the family
(whether the head of family, wife, son,
daughter, or uncle, etc.)

What is your sex?

Are you single, married, widowed or

divorced?

What was your age at last birthday?

Where were you born?

Where was your father born?

Where was your mother born?

In what year did you immigrate to
Canada (for foreign born persons)

In what year were you naturalized?

What is your nationality?

Where is your racial origin; from
what overseas country did your family
originally come?

Are you able to speak English? or
French?

What is your mother tongue (for
foreign born persons.)

Of what religious denomination are
you a member or adherent?

Are you able to read and write?

How many months at school since
Sept. 1, 1931? (for persons of school
age)

If you are a gainful worker, what
is your occupation?

In what industry are you employed?

Are you an employer, an employee,
or are you working on your own ac-
count?

The High River Times reports: A
frisky milch cow belonging to B. Cous-
ins strayed, in last week's paper from
the "For Sale" column into the "For
Rent." The result was that Mr. Cous-
ins was bombarded by neighbors with
requests for the rent of the cow by
the hour or by the day. The worst of
it was, most of them wanted to rent
her from 6 a.m. to 7 a.m. or from 6
p.m. to 7 p.m. and he had very little
demand for the other hours. He asks
that we herd her out of the "For rents"
back to the "For Sales."

A middle-aged spinster was apply-
ing for a shorthand typist's position.

"What did you say your age is?"

asked the head of the firm.

"I don't think I mentioned it, did
I?" she said nervously.

"Well, what is it?" persisted the
questioner.

"I've just reached twenty-one," re-
plied the applicant.

"Is that so," sniffed the business
man, "and what detained you."

"Hear about Jimson being in the
hospital?"

"In the hospital? Why, I saw him
last night dancing with a blonde."

"Yes, and so did his wife."

Canada Must Win World Championships

World Championships in 1932 will be won by farmers
who recognize that the cleanest and best quality
seed with the most careful cultivation are essential
to the production of exhibition grain. While it is
recognized that these things should apply to the
whole crop area, concentration upon a small plot is
the best plan for securing an exhibit sample. If
such a plot is subjected to extra preparation—with
more care probably than it is possible to devote to
the whole crop area—and sown to the very choicest
seed it will not only provide good quality foundation
stock for next spring's seeding, but a winning
sample for exhibition at

The World's Grain Exhibition and Conference

REGINA, JULY 25 to AUG. 6, 1932

This great World Exhibition and Conference is organized
for the benefit of Canadian farmers, for the advancement of
Canadian agriculture, to demonstrate the superiority of Cana-
dian field crops, to further stimulate a world-wide demand
for Canadian crop products—Canada against all
competitors must win the major awards.

\$200,000 in Cash Prizes

\$2,500 a first prize for 50 lbs. of wheat; 30 lbs.
of oats
\$1,500 for 40 lbs. of barley; 30 lbs. of rye
\$ 800 for 10 ears of corn
\$ 300 for 30 lbs. of peas; 30 lbs. of flax; 20 lbs.
of clover

All provincial committees have special literature for helping
intending exhibitors. For this information write the com-
mittee nearest you. ONTARIO: J. A. Carroll, Dept. of Agri-
culture, Toronto; QUEBEC: Paul Meibohm, Dept. of Agri-
culture, Quebec; NOVA SCOTIA: W. V. Langley, College of

CHAPTER XVII.—Continued

On the day when the boat dropped anchor in Port Antonio, Nick was up with the dawn. One glance through his porthole had driven him out of bed, in order not to miss a moment of the enchanted scene. Mountains, purple and hazy in the background—palm-covered hillsides dotted with red-roofed huts or houses—hedges of flaming hibiscus—sapphire skies, and water as blue as turquoise. The tropics!

Early though it was, boys with shining black bodies were swimming about in the water, as much at home there as were the fishes that kept them company. On shore were women, carrying huge baskets on their heads, or hung with gaily colored beads to sell to the tourists who would soon land.

The warm air—the rich coloring of the landscape—its very difference from the ice-clad New England he had left behind, caught Nick's imagination, and held it spellbound. If Gay were only with him! Sudden regret flooded through him—regret that she could not see it—that she was not here to share his joy in these strange,

CORN'S
LIFT OFF

An amazing remedy—acts in a few seconds and causes no pain. The corn shrivels up and loosens. Another application or two and the corn drops out. Wonderful—yes it is—but that is just how Putnam's Corn Extractor works. You can buy Putnam's Corn Extractor from any druggist for 35c.

PUTNAM'S

W. N. U. 1889

new sights. Share it he must with someone, or—

"It's fairyland, isn't it?" said Angela, her shoulder brushing his as she joined him at the rail.

She had approached so quietly that Nick heard no footstep, but he turned, throwing her a glance of unadulterated rapture—not rapture at her own charm, which was indeed great, but at the scene before them, and at "Life," which had given him this chance to drink of it.

"It's a dream come true," he answered. "I feel inclined to pinch myself, just to be sure that I am 'I.' I envy you the weeks you'll have here, Angela." (It had become "Nick" and "Angela" during those days of intimacy on the boat). "Kingston, I believe, is more of a city. However, I've got today to revel in it."

"Will you let me revel with you?" "That will be bully, if your friends will let you off."

She laughed softly, not thinking it necessary to explain that her friends were wholly innocent of her arrival.

"They'll have to. We'll go for a drive, Nick—nir one of those ridiculous darkeys to take us you know. It's not as new to me as it is to you. I came here with Mr. Halliday five years ago. Shall we wait for breakfast on the boat, or go ashore and get it at the hotel?"

"Let's go ashore. I can't wait another minute to begin exploring."

It's all too wonderful to be true, (he wrote Gay in his first letter after getting settled). It was a cinch meeting Mrs. Halliday, for she knew the ropes and just what I ought to do in the few hours I had at Port Antonio. We took a marvelous drive to Blue Hole, seeing strange and unbelievable things on every side. She was bully good company, too, and looked a peach, as she always does. I felt quite proud to be towed about by such a lovely lady. Tell Halliday that! It may make him sit up and take notice of her.

But you needn't let it trouble you, wife-of-mine. I know how you feel about Mrs. Halliday, so for your comfort I'll say that we've parted company. It was a queer coincidence our taking the same boat; but she's stopping at Port Antonio, and my work will keep me at Kingston for the present. So don't worry about your wandering boy. You wouldn't if you knew how constantly he thinks of you, and what a sinner he feels to enjoy things so tremendously when you aren't with him.

I'm only half alive without you, Gay. I'm like a man going about minus an arm or leg. That may not sound romantic but if you'll stop to analyze it you'll see how necessary you are to me—you and our precious little boys. I'm conscious of missing something all the time. . . .

Yes it was doing him good—the change. Gay saw that in his letters, which breathed of his old buoyancy. He wrote a page or two each day, and mailed them whenever a boat was going. Gay did the same, relating the home doings with the skill of a real story-teller, repeating the funny sayings of the children, and the quaint remarks of Uncle Sim, in a way that brought them very near to the absent one.

But she did not mention Angela Halliday. Nick noticed the omission, and put it down to forgetfulness until other letters also ignored the meeting. He knew then that Gay had purposely refrained from writing of it.

"She didn't like it," he puzzled, "yet she can't be jealous. That would be too absurd. Perhaps she just couldn't say anything pleasant on the subject so she said nothing. That would be like Gay—bless her dear heart! Still, I wish she'd spoken of it. Makes me feel sort of uncomfortable. She might at least have mentioned the coincidence of our meeting."

As for Halliday, he had turned the key on the Boston apartment and gone back to Bakersville. On Thursdays and Sundays, when Julie was off duty, he and little Martha had supper with the household across the hedge. To him, at least, Gay had not been silent regarding that unexpected meeting.

"It was so nice that Nick should find a friend aboard the boat," she said; while Halliday answered: "And equally nice for Mrs. Halliday."

Each was almost too obviously saying the correct thing. Uncle Sim, his shrewd old eyes watching them, grunted, and taking out his pipe asked Halliday for a light.

Things were going through Uncle Sim's mind these days which vaguely troubled him. One was the look in James Halliday's eyes as they watched Gay mothering little Martha. It had become a habit for the child to run over after her early supper, and share the bedtime story Gay told her boys. They made a pretty picture, thought Uncle Sim. No wonder Halli-

day liked to see it. Gay looked a real madonna with baby Nick cuddled in her arms, while Sonny and the little girl leaned lovingly against her on either side.

"That's somethin' they ain't any of 'em ever goin' to forget," he said to Halliday, who had come over to take his small charge home to bed. They stood in the doorway of the living-room, which was lighted only by the blazing logs upon the hearth. Deep in her story, Gay was wholly unaware of any audience save the youthful one beside her. Little Nick was in his nightgown, his small, bare feet stretched out to the welcome warmth. A big log burst apart, sending a shower of sparks into the dark above, and casting a veritable halo about Gay's head.

James Halliday breathed deeply at the words.

"No," he responded, "they will never forget it. I wonder if it isn't memories such as this, that keep us from falling when the way seems hard. I can remember—"

He broke off suddenly, as if his thoughts had betrayed him into an indiscretion. And in that moment little Martha turned and saw him. She slipped from Gay's encircling arm, and ran to him.

"I love you best," she whispered, as he caught her up. "I love you best of anyone."

It was the next day that Martha forced him into a decision he had long been considering. She was watching him use his typewriter, a pursuit of which she never tired; and having become accustomed to her presence it did not disturb him, because she rarely spoke. But this morning as he paused, hunting an elusive word, she said: "Sonny and little Nick—they have a daddy."

Halliday smiled.

"He sends them postcards, an'—an' letters, when he's away."

Halliday lifted the child onto his knee and pushed his machine aside, as if this interruption were more important.

"I—want one," went on the little girl soberly. "Couldn't you be my daddy? I'd like you best."

He held her a little closer.

"Are you sure," he questioned with pathetic eagerness, "are you quite sure I'd make a satisfactory one?"

"You're my best favourite," answered little Martha.

She reached up a small, plump hand to touch his cheek. Halliday caught and kissed it.

"Then," he said huskily, "that settles it. I believe you're my 'best favourite,' also."

But Martha, it seemed had more to say.

"They have a mother, too," she hesitated.

The new-made father winced.

"I know, but—wouldn't I do for both?"

"I'd like Mrs. Hastings for my mother. Please, Daddy."

The new name dropped sweetly and naturally from the child's lips, and Halliday, bending, kissed her bright head in passionate gratitude.

"I'd like—her," she persisted.

Had she looked up she would have seen a dark flush mount in the face above her.

"Do you know what a family is, dear little girl?" he questioned gently.

"Are—we one?"

He smiled.

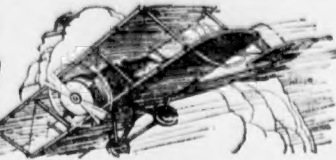

(To Be Continued.)

Persian Balm—the delight of dainty femininity. Imparts a fragrant charm to the complexion. Tones up the skin and makes it velvety soft in texture. Cooling, refreshing, it is delightful to use. Never leaves a vestige of stickiness. Invaluable for hands, face, and as a hair fixative. Wonderfully soothing and protective. Especially recommended in cases of roughness or chafing caused by weather conditions.

The welfare of wild fowl, such as grouse and quail, is closely linked with that of rabbits, since rabbits are a main food supply to them.

MINARD'S
"KING OF PAIN"
LINIMENT

The ADVENTURES of
CAPTAIN JIMMY
and his Dog SCOTTIE

WHAT CAME BEFORE: Landing his plane near the Chinese war zone Captain Jimmy takes three enemy prisoners away from their cruel captors. In the confusion that follows, he knocks out the Chinese Colonel by mistake.

After the Colonel recovered, I told the interpreter to tell him I had orders to take the three unfortunate enemy prisoners back to General Lu, who was a personal friend of mine. Colonel said, answered the interpreter, "He personal friend of Christopher Columbus, too, Hai Hai!"

Then I showed my pass. The Colonel glanced at it in embarrassment. He could not read a line. After some protesting, he consented to let me have the prisoners, but would not lend a hand to help. We were spoiling his fun, and we knew that if he could upset our plans without openly stopping General Lu's orders, he would gladly do it.

So after dark we quietly stole out of the house with our prisoners—but as we came near the plane, shadowy, sinister figures moved about.

Cautiously we crept along the ground toward the plane. The darkness covered us, and not a soul dreamed we were anywhere near. The Chinese whispered among themselves in subdued tones.

"What do they say?" I asked the interpreter.

"Big China boy say getes big rock, brakee whirlee stick."

So they were going to break the propeller.

"What else?" I asked.

"Little China boy say big China boy fullsee soup. Getee big rock, brakee wing."

That was enough for me. Feeling around in the dark, I found a big rock about half the size of a man's head. Swinging it back, I tossed it into the air, so it came down in the middle of the crowd.

There was a howl of pain, and then, such a time! Each one accused the other of hitting him, and in no time at all they were all at it, hammer and tongs. This

gave me my chance, and I crept up toward the cockpit of my plane. A few feet more, and I could make out the dim shape of someone sitting there—keeping watch!

I gathered myself for a spring. The light was about over up front and any noise would be quickly noticed. So, throwing caution to the winds, I jumped for that Chinese in the plane.

He turned with a blood curdling yell just as I hit him on the head. Not bothering to see what happened, I leaped over him into the cockpit; fired my gun just as I switched on my searchlight. The result was electrical. The mob started to rush back to the cockpit, when suddenly, with a bang the light flashed full in their faces.

Startled, they stood perfectly still for an instant—

then broke and ran. So far, so good! I whistled shrilly. There was a commotion in the field—Scottie was driving the prisoners in and making them step.

"You China boys hold wing so," I told them, showing them how to do it. I gave the propeller a whirl.

"Climb in," I yelled, and we started. Soldiers were running from camp to cut us off. Crack! went a rifle and a bullet sped by. Crack! went another and another. Up the road we came, gathering speed. Another thirty seconds and we were lifting, while the Chinese soldiers banged away until we were out of range.

Have you ever felt that something was wrong, and didn't know what? Have you ever sensed that someone was about to grab you but you couldn't see him? That was just the way I felt now. Someone was about to jump on me. Instinctively I turned my head—and looked right into the eyes of one of the most vicious, blood-thirsty faces I ever saw. It was the man I found in the plane. His arm was raised, and dimly I could see the glimmer of the long thin knife-blade he held. Through my mind flashed the thought, "Well, it's all over now."

(To Be Continued.)

Borden's Chocolate Malted Milk

The health-giving, delicious drink for children and grown-ups. . . . Pound and half pound tins at your grocers

Observed Ancient Fast Day

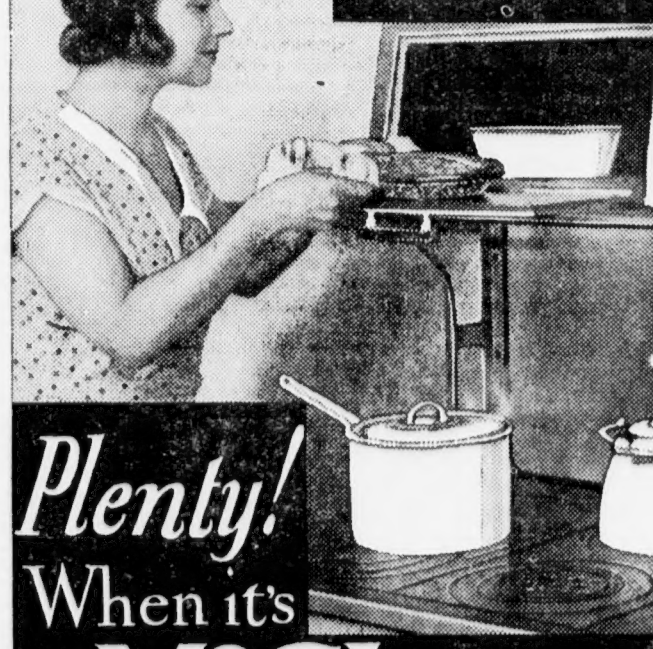

Mills were silent in New Hampshire, April 23, and stores were closed for the Granite State was observing fast day, a holiday that has come down from earliest colonial times. The day originally was set aside each year by the Puritans as one of fasting and prayer in which to offer thanks for surviving the bitter New England winter and in which to pray for the success of crops in the forthcoming season.

A New Food For Cattle

A floating fish meal plant, capable of turning 50 tons of fish into 12 tons of meal every day, is at anchor in Gothenburg, Sweden. The mill is installed on board a four-masted schooner. It grinds all the superfluous catch of the fishing trawlers, which was formerly thrown overboard, into a flour nutritious for pigs and cattle.

Seventeen thousand teachers now instruct London's 700,000 pupils.

TOWN & COUNTY Personalographs

Mr. and Mrs. Wm. Smith were Cal-
gary visitors last week end.

The work of putting new supports
under the floor of the Drug Store has
been completed. E. J. Hill had charge
of this contract.

Mrs. Jas. Bacon met with severe in-
juries last week when the front bolt
in the wagon broke as they were go-
ing up a steep incline near Hesketh.
The horses pulled Mr. Bacon out of
the wagon and Mrs. Bacon was left to
the mercies of the hill. In going back-
wards the wagon overturned and Mrs.

Bacon received a broken arm and other
injuries.

Mr. Wm. Levins is quite ill in the
Holy Cross Hospital, Calgary, and his
brother, Robert, went in on Monday
to see him.

Mrs. J. E. James spent the week end
with her husband in Calgary. We un-
derstand that Mrs. James and the boys
will not move to Calgary until after
school closes.

Born, to Mr. and Mrs. S. J. Garrett,
on Thursday, May 7th, a son.

Mr. and Mrs. A. G. Fox were Drum-
heller visitors on Sunday.

Rev. L. D. Batchelor spent the week
end in Calgary and returned Tuesday
evening.

Mr. and Mrs. J. Clayton of Calgary
came out last week and are spending
a few days visiting with relatives in
the district.

Oliver Pimm came up from Drum-
heller on Tuesday and spent a couple
of days in Carbon.

Mr. and Mrs. W. Van Loon were vi-
sitors to Drumheller on Tuesday.

The Ladies' Aid of the Carbon Unit-
ed Church, are sponsoring a play and
concert, to be held in the Elks' Hall
on Friday evening, May 22nd, at 8.00
p.m. Admission, School children 15c;
High school children 25c; Adults, 50c.

The weather remains hot and dry,
and no rain has fallen in the district
during the past week.

Snicklefritz

Magistrate (to prisoner): "How big
was the brick you threw? Was it as
big as my head?"

Prisoner: "Yes, your honor, but not
so thick."

Judge (in Chicago): "The officer
said you were doing sixty miles an
hour."

Defendant: "Yes, sir. But I had just
stolen the car."

Judge: "Oh, that's different. Case
dismissed."

"The time will come," shouted the
speaker, "when women will get men's
wages."

"Yes," said Trotsky, "next Saturday
night."

"How did Richlekeh make all his
money?"

"By judicious speculation and in-
vestment."

"And how did Poorman lose all his?"

"Gambling on the stock market."

A lady was canvassing for votes at
a parliamentary election and stopped
at a house, the door of which was
opened by a burly woman, who eyed
her none to graciously.

"May I ask," said the lady sweetly
"to what party your husband belongs?"

"Certainly!" answered the woman.
"I'm the party to whom he belongs,
and damn well he knows it."

The bride was asked what she now
thought of married life. She replied
"I only notice this change: Before we
were married he never knew enough to
go home, and now he never knows
enough to come home."

Good Printing

Is Not Necessarily Expensive

IT IS A QUESTION OF

Selecting Your Printer

We are Masters of the Art of Print-
ing. Our Service is unequalled, and
our prices are reasonable. Give us a
trial order, we guarantee you satis-
faction.
